Information Disclosure Statement

An initialed and dated copy of Applicant's IDS form 1449 is attached to the office action.

Allowable Subject Matter

Applicant's arguments filed on 9/24/2008 with respect to claims 1 – 7, 9 and 11 have been fully considered and are persuasive. The prior art rejection of claims 1 – 7, 9 and 10 has been withdrawn.

Claims 1 – 11 are allowed.

The following is an examiner's statement of reasons for allowance: prior art Terao, US Patent 6,651,167 discloses "a method and a system for authentication making use of: an interactive device for generating document secret information based on a document, a ticket which is generated from the document secret information and authentication characteristic information" and "a ticket issuing party issues interactive devices characterized by its unique secret function". Furthermore, Terao discloses "the ticket issuing party may distribute to users the interactive functions based on desired authentication characteristic information x in the form of tickets associated with desired documents".

However, prior art do not disclose "A system for evaluating a proof system comprising a prover supplied with a first random tape and a verifier supplied with a second random tape, wherein the prover communicates with the verifier to prove that the prover has a witness, comprising:

a generator supplied with a third random tape, for generating a common input and a witness from the third random tape based on a predetermined function, wherein it is difficult to use the predetermined function to calculate a witness from a common input;

a simulator supplied with a fourth random tape;

Art Unit: 2436

and a distinguisher supplied with a fifth random tape, wherein the generator supplies the common input to the prover, the verifier, the simulator and the distinguisher, and supplies the witness to the prover and the distinguisher; a proof history is generated with involving the prover; a simulated proof history is generated by the simulator without involving the prover;

and the distinguisher evaluates the proof system depending on whether a difference in distribution between the proof history and the simulated proof history is computationally indistinguishable for a great majority of possible common inputs and computationally distinguishable for at least one of the possible common inputs”, as recited in independent claims 1, 7, 9 and 11.

Dependent claims 2 – 6 are allowed by the virtue of their dependency on allowed parent claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
